

Forever Medical

Manufacturer 0.5T MRI Machine Scanner, Magnetic Resonance Imaging Medical MRI Scan Equipment

Model: YJ-0.5T

Product Description

What is the features of our MRI?

- Magnet Type: Self-constant temperature, non- Eddy current free, full open Permanent Nd-Fe-B magnet
- Field Strength:0.50T
- Spectrometer: Full Digital
- Receiving Coil: Phase Array Coil
- Comprehensive scanning sequence and advanced imaging techniques
- Highest magnet field
- Higher SNR, better resolution, less Scanning Time

What is the detail of our MRI machine?

Powerful image processing technology, powerful industrial computer(IPC) workstation, very convenient for image shearing, processing and storage, etc.

Better reconstruction technology, adopt senior reconstruction technologies like iteration/ interpolation, complete the signal data collection and K space filling in extremely short time, gain higher resolution images with much clearer fine structures.

Abundant of scanning sequences and imaging technologies based on years of MeCan experience and indefatigable product improvement.

MeCan software has complete and professional sequences which meet the scanning requirements of different parts and can simply gain high quality images based on its rich clinical experience.

Independent-developed operation system, doctors can easily and quickly register the patient, browse image, do advanced post-processing, external device connectivity and other functions.

Magnet open design with double rear column, in the premise of stable structure, it greatly improves the opening degree. doctors and family members can accompany the patients at multi-angle and zero distance. maximally avoid claustrophobia. provide a platform for interventional therapy

Perfect mid-field MRI system, greatly improved image quality, greatly shortened scanning time, Rich clinical diagnostic imaging sequences, allow the users to obtain the images with highest quality, provide the advanced imaging functions and convenient & powerful image post-processing technology to meet the needs of different customers.

High-performance shielding room design, professional construction team, ensure the scanning environment, undisturbed from outside, provide excellent scanning and operation environment.

Packaging & Delivery

Packaging Details

X-ray Film Digitizer Scanner

Medical Film Digitizer is suitable for export.

Medical Film Digitizer can be delivered by sea or by air.

Delivery Time

5~7 working days for the Medical X-ray Film Digitizer
